

Building the Capacity of Civil Society Organizations in TB Control - An Approach

3.4 Participants Logbook

Logbook

Every Civil Society Organization will use one logbook during this training course. The logbook is a tool to document together the important and relevant 'lessons learned' during this training. These 'lessons learned' can be inputs when developing your action plan at the end of the course.

How does it work?

At the end of every session you sit together with the members of your organization and discuss two questions:

- 1. What are the important lessons learned?
- 2. What could we use for our action plan?

Document this in this logbook and use these inputs whilst developing your action plan by the end of the training course.
